*The procedure for applying risk management to selecting tax declaration dossiers for inspection at the tax authority's office.*

On January 26<sup>th</sup>, 2024, the Director General of the General Department of Taxation issued Decision No. 98/QD-TCT on the process of applying risk management to select Value-Added Tax (VAT), Corporate Income Tax (CIT), and Excise duty declarations for inspection at the Tax Authority's Office.

**1. The process of applying risk management to select Tax declarations for inspection at the Tax Authority's Office**

The process provides guidance on the order, procedures, and steps to apply risk management in selecting VAT, CIT, and excise duty declarations of taxpayers that show signs of risk for inspection at the Tax Authority's Office, applicable to tax authorities at all levels: General Department of Taxation, Department of Taxation, Sub-Department of Taxation.

**2. The principle for evaluating, classifying, and handling the classification results of the risk level of tax declarations**

- The analysis, evaluation, and classification of the risk level are performed automatically and centrally on the risk management application (RMA).
- Monthly, the risk management department at the tax authorities of all levels directly managing the taxpayers coordinates with the Information Technology department to use the RMA in selecting tax declarations.
- Based on the total risk score of tax declarations and the risk threshold, the RMA automatically classifies the risk level for each declaration into one of three levels: high risk, medium risk, low risk. The results of risk analysis are used to classify the level of risk for taxpayers' tax declarations.
